## Commission Received for Architectural Design of new Cookstown Branch Library

The Innisfil Public Library Board (the Board) in conjunction with the Town of Innisfil (the Town) has selected Shoalts and Zaback Architects in association with Salter Pilon Architecture to design the new 9,000 square foot Library in the community of Cookstown. The demand for a new and larger branch library in Cookstown has been urgent for some time.

Occupancy of the new facility is scheduled for December 2008.
